

Math:

The purpose of the summer math work is to have students keep their minds engaged on math skills so they won't fall behind over the summer. Berkley Charter School has the program i-Ready math that our students are familiar with and the students know their username and passwords. This summer, please log on each **week for a minimum of 45 minutes** to complete math lessons at <https://login.i-ready.com> . We would like your pass rate to be 80% or higher.

Also, multiplication and division facts to 12 should be memorized and refreshed over the summer. You will have a multiplication or division timed facts quiz every other week in 5th grade.

If you are new to Berkley, please use this summer to make sure that you have your multiplication facts memorized from 0-12. We look forward to meeting you!

Enjoy your summer! We look forward to a great year in 5th grade!
